DESCRIPTION

Prism is a toolkit for organizing your layer panel via label colours.
The trial limits use to the first three label colours.

Colour Simply

- Colour all (or selected) layers with the same label.
- Each click cycles the label colour.
- Hold **ALT** to colour each layer differently
- Project Items: Same behaviour as above

Colour by Hierarchy

- Group label colours by parent/children chains
- Project Items: Items will be grouped by precomp/nested depth

Colour by Name

- Group label colours by layer type
- Hold **CTRL** / **CMD** to specify labels for types
- Project Items: Colour by item type

Colour by Type

- Group label colours by name, via an option
 - Group by a delimiter (for example, a hyphen or underscore)
 - Group by Left/Right
 - Group by both
- Project Items: Same behaviour as above

Colour Masks

- Colour all (or selected) layers with the same label.
- Each click cycles the label colour.
- Hold **ALT** to colour each layer differently

Prism²

Version: 2.0.1
aescrpts.com/prism

HEADLESS MODE

Prism also features "No UI" scripts for use with launchers such as ft-toolbar2.
Each function includes a few shortcuts.

Colour Simply

- Hold CTRL / CMD to launch Options
- Hold ALT to colour each layer differently

Colour by Hierarchy

- Hold CTRL / CMD to launch Options

Colour by Name

- Hold CTRL / CMD to launch Options

Colour by Type

- Hold CTRL / CMD to launch Layer Type Options
- Hold CTRL / CMD and ALT to launch Options

Colour Masks

- Hold CTRL / CMD to launch Options
- Hold ALT to colour each layer differently

LABELS SETTINGS

Active Labels

The labels that Prism will use to colour items and layers.

Labels Bank

Bank of unused labels.

Move to Bank

Move selected label(s) from **Active** to **Bank**

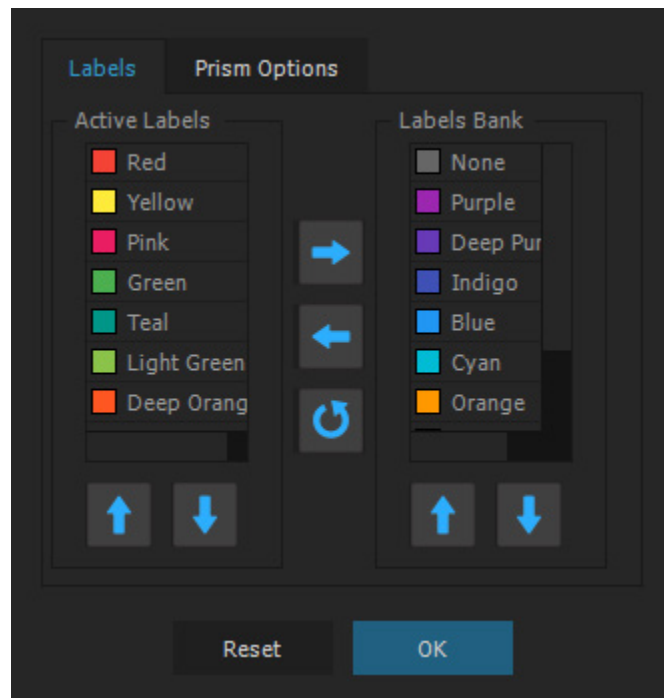

Move to Active

Move selected label(s) from **Bank** to **Active**

Reset Labels

Resets **Active** & **Bank** to Prism defaults

Hold **SHIFT** to reset to ALL labels

PRISM OPTIONS

Skip Locked Layers

Colour or skip locked layers.

Cycle on Each Click

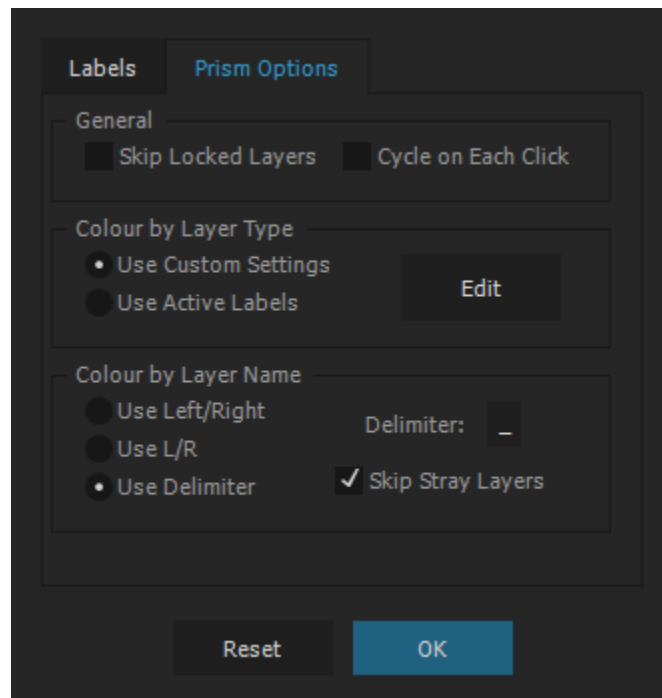

Offset the first label colour on each successive click, or always start with first label.

Colour by Type

Use Custom Type Settings (accessible by clicking 'Edit') or Active Labels.
Only applies to layers.

Colour by Layer Name

Easy options to group by "Left" and "Right", or "L/R" or the delimiter

INSTALLATION

Copy "Prism.jsxbin" to your ScriptUI Panels folder, usually here:

Windows

C:\Program Files\Adobe\Adobe After Effects CC 2017\Support Files\Scripts\ScriptUI Panels\

MacOS

/Applications/Adobe After Effects CC 2017/Scripts/ScriptUI Panels/
